

Analog Voice - Integrated Amplifier

by www.pwm.pe.kr (2006)

- | Zero Feedback 6V6 Push-Pull Power Amp - extremely clear and fresh
- | Improved Marantz-7 Circuit - more silky sound
- | Leakage Controlled Output Transformer - super flat bandwidth
- | MOSFET Regulated Power Supply with 15-second Timer
- | The power tube 6V6 can be replaced by 6L6 directly.

The sound can only be described as magnificent, warm and silky, but extremely powerful and live.

Preamp stage

Bandwidth: 20Hz~100kHz

Power Amp stage

Bandwidth: 20Hz~35kHz

Output impedance: 8 Ω

Output power: 15[W]/channel

AC input: 215~225[V] 0.5[A] 60Hz
